

EXHIBIT 2

Asserted Claims of U.S. Pat. No. 6,151,606

10. A system on an **untrusted client site**, comprising:
- a communications module for download data from a remote site, the remote site being connected via a network to the **untrusted client site**;
 - program code for placing the download data in temporary storage on the **untrusted client site**;
 - an application program interface coupled to the communications module for communicating with a **workspace data manager** to present the downloaded data; and
 - program code coupled to the application program interface for **automatically disabling** the **untrusted client site** from accessing at least a portion of the downloaded data **after a user has finished using the data**.
11. The system of claim 10, further comprising an **instantiator** for requesting the **workspace data manager** to provide an interface for enabling presentation of the downloaded data.
19. The system of claim 10, further comprising a data reader for translating the downloaded workspace data from the format used by the remote site to the format used by the **workspace data manager**.
21. A computer-readable storage medium storing program code for causing a computer to perform the steps of:
- executing a **workspace data manager** on an **untrusted client site**;
 - requesting the **workspace data manager** to **access data temporarily** from a remote site, the remote site being connected via a network to the **untrusted client site**;
 - initiating a communications channel with the remote site;
 - downloading data from the remote site;
 - placing the data in temporary storage on the untrusted client site;
 - using the **workspace data manager** to present the downloaded data; and
 - automatically disabling** the **untrusted client site** from accessing at least a portion of the downloaded data **after a user has finished using the data**.

20. A system comprising:

means for executing a workspace data manager on an untrusted client site;

means for requesting the workspace data manager to access data temporarily from a remote site, the remote site being connected via a network to the untrusted client site;

means for initiating a communications channel with the remote site;

means for downloading data from the remote site;

means for placing the data in storage on the untrusted client site;

means for using the workspace data manager to present the downloaded data; and

means for disabling the **untrusted client site** from accessing at least a portion of the downloaded data **after a user has finished using the data.**
